

A grey vertex is a regular Thing, an orange vertex is a customizer. Customizers are Things that can be remixed directly on the platform without any CAD skills.

The size of a vertex indicates how many parents it has.

The color of the edge shows the form of the remix relationship:  
**Grey edge:** Parent and remix are regular things  
**Orange edge:** Parent and remix are customizers  
**Light orange edge:** Parent and remix different type

**Example of a remix:** Two logos and a board are remixed into a new board.
